

Topics of research	
	Verve has undertaken study on the feasibility of LED vis-à-vis CFL and risks associated with LEDs.
	Verve has undertaken study PAT scheme implementation in India and required need assessment across the industries.
	Verve has undertaken study on various sectors that requires Adaptation measures towards the impact of Climate Change in India.
	Verve has undertaken study on the low cost housing using environment friendly technology, cost economics and implementation challenges in India.
	Verve has undertaken study on the environment friendly construction techniques, integrated compact design for cost savings in terms of resource utilizations and eco-friendly design aspects.
	Verve has undertaken preliminary feasibility on Inland Water Transport in Orissa as a means of industrial development.
	Detailed feasibility report of the business of pipeline based NG distribution.
	Study on natural gas possibilities for industries in Orissa, AP and West Bengal, after the Mahanadi and Godavari basins go on tap later in 2007.
	Preparing a comprehensive list of possibilities of carbon emission reduction in industry in India
	Possibilities of increasing energy efficiency in power plants
	Detailed methodology for reduction of transmission losses
	Assessment of direct or indirect potential of GHG emission reduction issues in Pharmaceutical industries
	Assessment of direct or indirect potential of GHG emission reduction issues in Pharmaceutical industries
	Trade Mechanism for Certified Emission Reduction(CER) and Verified Emission Reduction(VER) pricing options
Power	Exploring possibilities of SF6 reduction in transmission and distribution of
	Carbon capture and storage
	Assistance in developing PCN, PDD & PIN of a bundled fuel switchover from coal to natural gas project through GSPC Gas Company Limited, India.
	New Process Innovations and Technology Improvements in Refineries/Chemical

Industries
Carbon Markets – Current and Future trends
Feasibility assessment for a Bio-mass based Power plant in Orissa
Public Private partnerships in road infrastructure
Highway landscape development
Home stays in India
Mapping requirements for Rural Infrastructure in Jajpur District, Orissa
Budget – hotel accommodation
Agri-based SEZs
Organic farming on a contractual basis
Operationalizing heli- services in Uttarakhand
Feasibility for developing the proposed National Waterway 5 for inland water transport and mapping port infrastructure for export of ores and minerals.
Secondary research and proposal development for Setting up a Centre for Excellence for food processing in Gujarat
Mass Rapid Transport System
Identifying possibilities of Public Private partnerships and developing a model for rural water and sanitation sector
Eco-Tourism at Bhitarkanika, Orissa
Possibilities for PPP and developing a model for an urban infrastructure project (e.g. multiplex/multiple parking/market complex)
